

## CalSCIP Vision, Mission, Goal, and Objective Statements DRAFT

The following are recommended vision, mission, goal and objective statements for the CalSCIP. Data for the vision, mission and goal statements are primarily derived from the January 2007 PSRSPC Report to the Legislature that was vetted and approved by the CalSIEC, from the Second Draft CalSIEC Governance document and from the SAFECOM Continuum. The objectives are recommendations derived from previous statewide interoperable communications planning work throughout the nation by the CalSCIP support team.

The vision, mission, goal and objective statements recommended here are for the Statewide Communication Interoperability Planning effort. The CalSIEC and the PSRSPC will maintain their own pre-determined vision, mission and goal statements as documented in their perspective plans.

Vision
By 2017, ensure all local, regional, state, and federal public safety agency first-responders operating within California will be able to communicate using compatible systems, in real time, across disciplines and jurisdictions, to respond more effectively during day-to-day operations and major emergency situations.
Mission
Provide a statewide strategic planning framework for an innovative, inclusive, scalable, sustainable, and well-managed interoperability infrastructure that reflects national standards, and is effective in addressing the unique urban and rural requirements of the public safety agencies and public service organizations serving the citizens of California.
Goals
<i>In support of the strategic vision, the following goals focus on improved interoperable communications by 2017:</i>
<i>Goal 1: Governance</i> – Maintain coordinated governance for integrated statewide public safety voice and data interoperable communications systems planning
<i>Goal 2: Standard Operating Procedures</i> – Maintain NIMS/SIMS compliant Standard Operating Procedures for statewide interoperable communications
<i>Goal 3: Technology</i> – Develop a statewide standards based “System of Systems” communications network for California’s public safety practitioners
<i>Goal 4: Training &amp; Exercise</i> – Ensure regular statewide interoperable communications training and exercise opportunities for California’s public safety practitioners
<i>Goal 5: Usage</i> – Encourage statewide daily usage of interoperable communications equipment and standard operating procedures

## Objectives

*Strategic objectives to cut across the strategic goals and focus California on the breadth of interoperable communications and the steps required to get there.*

*Objective 1:* Provide statewide interoperability governance and outreach

*Objective 2:* Achieve communications operability for state agencies and localities as necessary to support interoperability

*Objective 3:* Achieve voice and data interoperable communications within each locality to enhance multi-discipline response capabilities for local response

*Objective 4:* Achieve multi-discipline and multi-jurisdiction voice and data interoperable communications to enhance regional response capabilities

*Objective 5:* Enhance state agencies' voice and data interoperable communications across California to provide comprehensive support during emergencies

*Objective 6:* Provide tools necessary for region to region and region to state voice and data interoperable communications to enhance mutual aid response capabilities

*Objective 7:* Create communications back-up and redundancy for interoperability systems to ensure communications are maintained following catastrophic events

*Objective 8:* Support interoperable communications with federal entities, other states and Mexico to respond to national, multi-state and international emergencies

*Objective 9:* Achieve the integration of private entities identified as part of critical infrastructure/key resources and the participants in the state emergency operation plan (EOP) into interoperability efforts to ensure communications are maintained during emergencies and recovery efforts
